## Academic Performance Awards

### Summary

MTSU's Academic Performance Award recognizes departments whose graduating seniors perform above average on their major field exams. A department will receive the award if at least 55% of a major's MFT scores are greater than the major's comparison score. The award consists of a plaque and a monetary award for the department's travel budget. MFT awards are limited to one per department per year.

Academic Performance Awards are also given each year to the two departments whose students achieve the highest averages for the year on the general education exit exam. MTSU uses the California Critical Thinking Skills Test for this assessment. The award consists of a plaque and a monetary award for the department's travel budget. A department may receive both the MFT and the General Education Award in the same year. Departments that have received an Academic Performance Award are listed below.
